# ARMCHAIR MALORIN

The Malorin outdoor chair is made of powder-coated aluminum, making it lightweight, extremely robust, and designed for daily use on terraces and in beer gardens. The striking, curved frame makes a clear design statement and gives your outdoor area a high-quality, distinctive look. The tightly stretched synthetic ropes are water-resistant, do not absorb moisture, and dry quickly after a shower. They offer a pleasantly flexible seating feel without sagging or stretching out. The chair is weatherproof and UV-resistant, so it remains reliable even with continuous use in sun and rain. Important for everyday service: it is stackable, easy to clean, and space-saving to store.

- Eye-catching, curved aluminum frame that immediately makes a design statement in outdoor hospitality areas.
- Water-resistant, tightly stretched synthetic ropes for quick-drying comfort without absorbing water.
- Weather- and UV-resistant as well as stackable – made for tough continuous use and efficient storage.
- Design-Statement
- Waterproof, quick-drying plastic ropes
- Weather and UV resistant and stackable
