TABLETOP VARIO STRONG

Vario Strong is the choice if you are looking for a durable tabletop for indoor use with a wood effect finish. The composite tabletop is made of high pressure laminate (HPL) and is impact-proof, easy to maintain and very robust. The wood effect finishes are hardly distinguishable from real wood in terms of their appearance and surface structure. The surface fulfils the requirements of DIN EN 438 for kitchen countertops. Vario Strong is available in round, square and rectangular versions and in several different sizes. Customized sizes and rounded forms of edges are also possible.
