

CHAIR GION

Gion is a classic Viennese coffee house chair made of bentwood. It is available in either walnut beech, black beech or beech oak stained and lacquered. Bentwood is bent solid wood. The process of bending wood without it breaking was developed around 1830: the master carpenter Michael Thonet succeeded in using steam to give wood a stable bent shape - steam causes the lignin, which is responsible for the strength of wood, to soften and the piece of wood can be bent. The process is still called the Thonet process after its inventor. Beech wood in particular is very easy to bend into a beautiful shape due to its comparatively short wood fibers.
